PLANT FACT SHEET

Acacia iteaphylla F. Muell. ex Benth.

GENUS *Acacia* **FAMILY** Fabaceae

COMMON NAMES Flinder's Range Wattle

EDIBLE PARTS AND USES

Edible parts: Seeds

DESCRIPTION

A shrub. It grows 2-5 m tall. The stems are slender and the branches spreading. The leaves (phyllodes) are silvery blue-green. The flowers are in long heads. The flowers are yellow. The pods are raised alternately over the seeds.

HABITAT

It is a temperate plant. It grows naturally on sands and Jarrah woodland. It is resistant to drought and frost. It needs an open sunny position. Tasmania Herbarium.

PRODUCTION

Cultivation

Plants can be grown from treated seeds.

NOTES

There are about 1,350 Acacia species. Over 1,000 occur in Australia. Also as Mimosaceae.
