PLANT FACT SHEET

Edibility uncertain
It has not been confirmed that this plant is safe to eat. Do not eat it on the strength of this fact sheet alone.

Erythronium propullans A. Gray

GENUS *Erythronium* **FAMILY** Liliaceae

COMMON NAMES Minnesota dwarf trout lily

EDIBLE PARTS AND USES

Edible parts: Bulb

DESCRIPTION

A herb. It is a lily. The bulbs are 10-25 mm long. It produces a stolon or runner that then produces a new bulb. The leaves are 4-13 cm long and have irregular spots. The flowers are pink and 1 cm long. New shoots develop from the stems above the bulbs.

HABITAT

It is a temperate plant. It grows near rivers and on flood plains. It grows at about 300 m above sea level.

PRODUCTION

Cultivation

It is normally grown from bulbs. Plants can occasionally grow from seed.

NOTES

It is a rare plant.
