PLANT FACT SHEET

Greenwayodendron suaveolens (Engl. & Diels) Verdc.

GENUS *Greenwayodendron* **FAMILY** Annonaceae

EDIBLE PARTS AND USES

Edible parts: Fruit

DESCRIPTION

A tree. It grows 35-45 m tall. It loses its leaves during the year. The trunk is 25 m long before branches. It is 70-90 cm across. The bark is smooth and grey. The leaves are simple and alternate. They are narrowly oval and 4-12 cm long by 2-6 cm wide. They can be larger. The flowers are in groups of 8-12. They are often opposite the leaves. The fruit are made up of 10 follicles 1-2 cm long. They are purple to red. They have 1-2 seeds.

HABITAT

It is a tropical plant. It grows in humid evergreen and deciduous forests. In Uganda it grows up to 1,100 m above sea level.

PRODUCTION

Harvesting and Seed Production

Plants flower in January and October and fruit in March, May, June, and October.
