PLANT FACT SHEET

Mimulus glabratus H. B. Kunth

GENUS *Mimulus* **FAMILY** Phrymaceae

COMMON NAMES Berro, Placa

EDIBLE PARTS AND USES

Edible parts: Leaves

The leaves are eaten raw in salads. They are also cooked.

DESCRIPTION

A herb. It grows each year from seed. It grows about 30 cm tall. The leaves are oval and have teeth long the edge. They are 2-3 cm long. The flowers occur singly and are 1.5 cm long.

HABITAT

It is a temperate plant. It grows in water or damp ground. It grows in wetlands. It grows in Patagonian steppe in Argentina. In Argentina it grows from sea level to 4,500 m above sea level.

NOTES

There are 150 Mimulus species. It has also been put in the family Scrophulariaceae.
