PLANT FACT SHEET

Passiflora morifolia Masters

GENUS *Passiflora* **FAMILY** Passifloraceae

COMMON NAMES Woodland passionflower

EDIBLE PARTS AND USES

Edible parts: Fruit

DESCRIPTION

A climbing herb. The stems are yellow. They are grooved and slightly four angled. There are tendrils in the axils of leaves. The leaves are alternate and have 3 triangle shaped lobes. They are heart shaped at the base. There are teeth around the edge. The leaf stalks are 6 cm long. The flowers occur singly. They are 2-3 cm across. They are white and mottled with red. The fruit are 2 cm across. They are blue-green and roughly hairy.

HABITAT

A tropical plant.

NOTES

There are about 400 Passiflora species.
