PLANT FACT SHEET

Sebaea leiostyla Gilg.

GENUS *Sebaea* **FAMILY** Gentianaceae

EDIBLE PARTS AND USES

Edible parts: Leaves

DESCRIPTION

A herb. It is erect and can grow for one or more years. It grows 60 cm high. The stems are slender and have 4 ridges. The leaves are almost round and do not have leaf stalks. There are 5 veins from the base. The flowers are in dense groups with many flowers at the ends of the shoots. They are bright yellow. The fruit is a narrowly oval capsule.

HABITAT

It is a tropical plant. It grows in grassland and over moist rocky outcrops between 1,300-2,140 m above sea level. It can occur at higher altitudes.
