PLANT FACT SHEET

Azorina vidalii H. C. Watson.) Feer.

GENUS *Azorina* **FAMILY** Campanulaceae

EDIBLE PARTS AND USES

Edible parts: Leaves

DESCRIPTION

An evergreen shrub. It grows 0.6-2 m tall. The stems are woody and branched. The leaves are spoon shaped with teeth around the edge. They are 5-15 cm long. They are crowded towards the ends of the stems. The flowers are in loose spikes. They are bell shaped and hang down. They are white or pink. They are 5 cm long.

HABITAT

It is a Mediterranean climate plant. It grows naturally in the Azores of Portugal. It grows on sea cliffs. It needs full sun or light shade. It grows on rocky, free-draining soils often in exposed sites. It is damaged by frost.

PRODUCTION

Cultivation

Plants are grown from seed. They can be grown from softwood cuttings.

NOTES

There is only one Azorina species.
