PLANT FACT SHEET

Dipcadi serotinum (L.) Medik.

GENUS *Dipcadi* **FAMILY** Asparagaceae

COMMON NAMES Dipcadi

EDIBLE PARTS AND USES

Edible parts: Bulb

DESCRIPTION

A bulb plant. It does not have hairs. It keeps growing from year to year. The leaves are at the base and narrow. There are only a few leaves and they spread out. They are greyish-green. The flowers are greenish to brownish-yellow. They are in one sided racemes. The tepals are 12-15 mm long. They are narrow and the outer 3 curve outwards. The inner 3 are straight. They all fuse in the lower section. The fruit is a small capsule.

HABITAT

It grows in rocky, stony and sandy places. It grows in dry locations.

NOTES

They have also been put in the families Hyacinthaceae and Liliaceae.
