PLANT FACT SHEET

Thalictrum thalictroides (L.) Spach.

GENUS *Thalictrum* **FAMILY** Ranunculaceae

COMMON NAMES Rue-anemone

EDIBLE PARTS AND USES

Edible parts: Root

DESCRIPTION

A tuber producing plant. It grows 15-25 cm high and spreads 20-25 cm wide. The leaves have 3 lobes. There are 2-5 flowers on thin stalks. The flowers are 2.5 cm across. They are usually white but can be pink.

HABITAT

A cool temperate plant. It can grow with some shade. It grows well in woodland under deciduous trees. It needs rich, well drained soil. It does not suit hot areas with low rainfall. It suits hardiness zones 4-8.

PRODUCTION

Cultivation

Plants are grown from tubers. They are placed just below the surface and spaced 20 cm apart. It does well if lightly covered with rotted organic matter. It can be grown from fresh seed.

NOTES

There is only one Anemonella species.
