

Common names

Fabaceae

Bush mango, Sunbird tree,

Scientific name

Cordyla africana

Edible portion Fruit, Seeds, Flowers - nectar,

Description

It is a large tree. It grows up to 22 m tall. The trunk can be 1.2 m across. The branches spread widely. The bark is greyish brown and has furrows along it. The leaves are divided once. They are 25 cm long with about 9-12 pairs of leaflets with one at the end. The leaflets are 2.5-4 cm long. They are dark green and smooth. There are dots which let light through scattered over the leaf surface. The flowers occur in small sprays in the axils of leaves. The flowers face upwards and are filled with nectar. The fruit is a yellow fleshy succulent fruit. It is about 4 cm long and oval. It has a leathery skin and 1-8 seeds inside. The seeds are embedded in the sticky flesh. The fruit are edible.
